CORE STACK

Frontend

- TypeScript
- React
- Next.js
- Tailwind CSS
- Radix UI
- TanStack Query
- Zustand
- Redux

Backend & APIs

- Node.js
- Express
- NestJS
- REST
- WebSockets
- SSE

Data

- PostgreSQL
- MongoDB
- Prisma
- Drizzle

Quality & Delivery

- Playwright
- Vitest
- AWS
- Docker
- GitHub Actions
- Accessibility

HIGHLIGHTS

Millions of users on the poster product built end to end.
300K+ live coordinates rendered on a nationwide activity map.
6+ production product surfaces shipped solo from wireframe to release.

EDUCATION

BCA
IGNOU, New Delhi
2025

PROFILE

Frontend engineer with 3+ years of experience shipping production products — admin platforms, configurable content systems, real-time workflows, and data-heavy visualizations. I own frontend architecture from wireframe to release, with a focus on reliable state, accessible controls, resilient failure paths, and performance-conscious rendering.

EXPERIENCE

AUG 2023 — PRESENT

Front End Developer · Techpix.in

Gurgaon, India
Remote

- Own frontend architecture across multiple production products built with React, Next.js, and TypeScript — from wireframe to deployment.
- Built a multi-role consulting platform across Creator, Consultant, and Student roles: a nested journey/form builder with drag-and-drop inputs, reusable templates, role permissions, rich text, tables, media, uploads, and conditional fields.
- Connected student and consultant workflows — progress tracking, deadlines, appointments, college discovery, assignments, notes, and threaded conversations.
- Built the Poster ecosystem used by millions: an admin platform for configurable canvas-based post authoring, analytics, WATI campaigns, and scheduling, plus a mobile-first user app with OTP onboarding, personalized feeds, and multi-field poster editing.
- Implemented a client-side Canvas export pipeline with validation, variable mapping, layers, and natural-resolution rendering, routed through native WebView, Web Share, clipboard, download, and WhatsApp fallbacks.
- Engineered a Leaflet India activity map that filters, aggregates, and density-buckets 300K+ live coordinate records for a nationwide campaign.
- Delivered within test-backed practices using Playwright and Vitest; collaborated on REST/SSE/WebSocket integrations and shipped through Docker, AWS, and GitHub Actions CI/CD.

SELECTED CLIENT WORK

VIA TECHPIX · PRIVATE REPOS

MULTI-ROLE PLATFORM

Multi-Role Consulting Platform

Creator, Consultant, and Student experiences with a dynamic journey/form builder, permissions, templates, progress tracking, appointments, notes, and college workflows.

CONSUMER · MILLIONS OF USERS

Poster Ecosystem

Admin operations platform and mobile-first user app for configurable poster discovery, content operations, WATI distribution, Canvas rendering, and WhatsApp sharing.

FRONTEND · API CONSULTATION

Visa Application Platform

Customer and admin visa applications covering discovery, multi-traveller flows, documents, payments, status tracking, and operational review.

PERSONAL · PUBLIC

Chatty

Real-time chat platform with one-to-one and group messaging, file sharing, and emoji support — React, Socket.io, Node.js. Live at chatty.evileyedev.in.
